Professional Summary

Self taught Developer with hands on experience building responsive, interactive web applications using HTML, CSS, and JavaScript (ES6+). Experienced in translating Figma designs into accessible, responsive interfaces and using Git, GitHub, Webpack, and Jest in development projects. Familiar with React, REST APIs, and JSON, with a strong focus on clean, maintainable code and continuous learning.

Skills

Frontend:
HTML5, CSS3, JavaScript (ES6+), Responsive Design, Semantic HTML, Accessibility.

Frameworks & Familiarity:
Familiar with React, RESTful APIs, JSON, Node.js, Express.js, JWT.

Design to Code:
Figma to Pixel Perfect Conversion, Design Systems, Reusable UI Components.

Testing & Build Tools:
Jest, Webpack.

Database:
SQL, PostgreSQL.

Languages & Tools:
Python, Git, GitHub, Linux, Chrome DevTools, Postman, Figma.

Projects

GIF Finder (Live Demo), *Technologies: JavaScript, HTML5, CSS3, GIPHY API*
- Developed a responsive GIF search application using the GIPHY API and JavaScript Fetch API with async/await.
- Implemented keyword based search, pagination, and dynamic rendering of GIF results using DOM manipulation.

JavaScript Testing Practice (GitHub Repo), *Technologies: JavaScript, Jest*
- Wrote unit tests for JavaScript functions using Jest to verify expected behavior.
- Practiced test assertions, edge case handling, and debugging to verify expected function behavior.

Full Stack Food Delivery Application (GitHub Repo),
Technologies: React.js, Node.js, Express.js, PostgreSQL, JWT, REST APIs
- Built a role based app with user authentication, protected routes and a meal management system.
- Follows full stack best practices; actively improving functionality and UI responsiveness.

Education

05/2009 – 04/2013 **Bachelor of Science in Electrical & Electronic Engineering,**
CGPA: 3.88 out of 4.00 *Stamford University Bangladesh*

Professional Development

The Odin Project: Open Source Web Development Curriculum, *Self Directed Learning. Ongoing.*
- Following a structured, project based curriculum to develop practical web development skills.
- Learning HTML, CSS, JavaScript, Git, and GitHub, with a focus on responsive web design, programming fundamentals, and testing.
- Building hands on projects to apply programming concepts, strengthen problem solving skills, and practice writing maintainable code.
